EDUCATION

Siksha 'O' Anusandhan University (ITER)

Bachelor of Technology in Computer Science Engineering

Nov 2022 – May 2026

CGPA: 9.61

EXPERIENCE

Full Stack Engineer Intern

Super Effective

Sep 2023 – Aug 2024

Remote, Cayman Islands, UK

- Developed the **Select Threader Chrome Extension**, replacing an expensive Twitter bot and potentially saving **\$5000 per month** by bypassing **Twitter API V2 pricing**. The extension scrapes threads from Twitter, Reddit, and other websites, and allows users to create and share thread pages with just a few clicks, directly integrating with the app and website.
- Set up CI/CD pipelines** for the Threader, enabling **biweekly releases**, and integrated **Sentry for performance monitoring** within the Chrome extension environment.
- Created an Elixir service called Twitter BreadCrumb Service that uses **OAuth V2** to leave breadcrumbs on Twitter, enhancing organic growth and user engagement.
- Migrated the threads **PostgreSQL** database table and wrote multiple **unit tests** to support this post type. Fixed minor bugs based on logs from **Grafana Loki** and **Prometheus**.
- Integrated thread pages into the **Next.js Web Client**. Fixed minor bugs related to login events thrown by the **Select Auth Service**.

PROJECTS

UnbreakableMe on Google Play | *ReactNative, Expo, Google Gemini*

Aug 2023 - Sep 2023

- UnbreakableMe, a platform born out of the unwavering determination inspired by David Goggins' life and his book, "Can't Hurt Me: Master Your Mind and Defy the Odds." I believe that every individual possesses the strength to overcome their darkest moments and rise above the challenges life presents.
- Worked with everything from **Audio/Video** and **AsyncStorage** to **Touch and Swipe Gestures** and **AI chat** with David Goggins using Google Gemini
- This was built as a part of **Nights and Weekends S4** by **Buildspace**, which I graduated successfully!

Hackathon Speedrunner Frontend & Backend | *React, Redux, Express, JWT, NoSQL* May 2023 – July 2023

- Developed a one-stop solution for tracking hackathons and team building using **MVC Architecture**.
- It **Web Scrapes** event data in real-time from a number of websites, and the events that aren't tracked, users can post themselves. I used **Cloudinary** for image **Storage Bucket** and Multer for handling file uploads. Worked a lot with **Multipart form data**.
- Implemented security features including **CORS protection** and **JWT** for authentication, enhancing the security and robustness of the application.

SKILLS

Languages: JavaScript, TypeScript, Java, Elixir, Python, SQL, HTML, CSS

Frameworks: Next.js, React, React Native, Redux, Node.js, Express, Phoenix

Operating Systems & Environments: Debian, RHEL, Hyprrland, i3, UNIX shell, Bash, SSH

DevOps & Tools: Git, Docker, GitHub Actions, CircleCI, Prometheus, Grafana, Loki, Ansible, Vault

Editors: JetBrains IDE, Nvim, VSCode

Cloud Platform: Amazon Web Services

Databases: PostgreSQL, Redis, MongoDB

ACHIEVEMENTS & VOLUNTEERING

Twilio Quest: Won Twilio Quest in Global Hack Week, Sep 2022

Leetcode: Rated 1604 in Leetcode

Open Source Events: Contributed to Open Source as a part of **Hacktoberfest 2022** and **GSSOC 2023**
